removed.txt

Mr. Wang:

It's been a remarkably fast New Year, likely on your end as well.

Following up regarding the Ute Tribal 16-13: In conferring with our Roosevelt field personnel, it appears the issue was a hole in the tubing, which required replacement of the tubing and packer. I have asked our District Manager to forward the workover records, which I will forward to you via email.

Regarding the evidence of mailing of the initial letter: we had a staff reduction last summer that resulted in a change of our standard filing process. I am still reviewing the electronic and physical mail-receipt files to determine whether the notice was properly mailed with tracking receipt. May I confirm by Monday? At that point, I will have exhausted the possibilities for receipt for mailing.

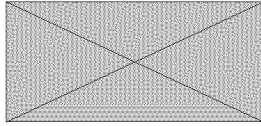

Appreciate your patience. (Also, since we last spoke, I have mailed several standard 5-year MITs for other wells, which I trust you have received OK?)

Thanks again.

Nicole

Hi Nicole,

Hope you've had a good new year so far. I wanted to check up on whether you have any certified records regarding the notification on the mechanical integrity loss on the Ute Tribal 16-13 Well? Also, can you provide the workover records for the repair of this well? We would like to have records of the remedial actions for the record before we may authorize the well to resume injection. Please let me know if you have any questions on this matter. Thanks.

Nicole,

In reviewing the resume injection request letter, can you provide additional details as to what was determined to have caused the MI loss and what remedial activities were conducted to reestablish the mechanical integrity? Thank you.

Mr. Wang:

Thanks again for your time on the telephone.

Upon review of the electronic file, I see the following letter dated 09/26/16, as our initial notice. I'm reviewing our associated mailing-receipts file to locate any tracking detail as proof of mailing.

Thanks again.
